

Installation & Operations Manual: Polaris RZR UTV Dust Panel

1. Lay the Dust Panel over the roll cage of the vehicle making sure the straps are on the outside of the roll cage. Secure the top straps first. If some straps interfere with your hardtop mounting configuration, omit the attachment of those straps.
2. Locate the straps running down the length of the rear vertical ROPS bar. Fasten around the bar. Repeat this step for the opposite side.

3. Adjust the straps for tight fit.
 4. Clean the surface where the velcro attaches with rubbing alcohol. Then, attach the velcro by peeling off the backing and sticking it to the cleaned surface.
 5. Trim the velcro to lay only on the flat surfaces.
- Congratulations** – You have now finished the installation of your Dust Panel.

RZR 900 installation:

Same as above, except the velcro will be attached to the horizontal surface on the driver's side and the vertical surface on the passenger side.

How to get Help - If you have any questions, comments, need assistance, or are missing parts, please call 1-866-838-3366 between 9:00AM and 5:00PM EST. You can email us at support@seizmik.com, visit www.seizmik.com to download installation guides and product info, or contact your powersports dealer where you purchased your Seizmik product if you need additional assistance.
