Installation:

1. Peel plastic 4" back on edges of windshield. Remove completely after windshield is fully installed.

2. Push 49" 90-degree bulb gasket onto lower windshield with the bulb section oriented as shown. Push 63" 180-degree Bulb Gasket onto lower windshield.

3. Push the 13.25" gaskets on the upper windshield with the bulb section oriented as shown.

4. Place clamps on roll cage in approximate locations shown. Be careful not to pinch fingers.

5. Place upper windshield in location shown. Gasket bulb should be against roll cage.

6. Insert bolt through washer and windshield, loosely install nuts on both top clamps.

7. Insert bolt through washer, bracket cover, and windshield, loosely install nuts on 4 side clamps.

8. Once all clamps are loosely attached it should look like this.

9. Insert lower windshield. It should fit snugly against rear speakers, behind seat belt, and against upper windshield.

10. Place 4 remaining bracket covers on upper windshield as shown.

11. Use brackets to connect upper and lower windshield. Insert bolt through washer, bracket cover, and windshield and loosely install nuts on all 4 brackets. Only top bolt has bracket cover.

12. The bracket slots allow for adjustment in the lower windshield so that you may ensure the windshield gasket seals along bottom edge. Make sure windshield is centered and snug, tighten all bolts.
